

## Center development, Diepoldsau

### Construction site documentation and monitoring

A five-story building with a restaurant and event hall seating approximately 400 people, as well as guest rooms and retirement apartments, will be constructed on the former post office site. A new school building will also be built to expand the Mitteldorf primary school and include an after-school care facility. The renovation of the existing building and the construction of a new commercial building are also part of the center development.

The construction site is documented daily with two of our TEDAMOS CraneCams.
